Who We Are:

We are a team of three who want to increase peace worldwide in our own way of thinking. We are contributing to the society, without demanding anything in return, so that people are interested can help themselves and their society through these resources. We do not solicit any particular ideology. None of us demand any money from anyone by using the reputation of this forum. If you have any such complaints, please let us know at this email:

unannesha@gmail.com

What We Do:

- Juristic writing on law.
- Holding a prayer service.
- Spiritual Counselling
- Spiritual Dispute Resolution
- Spiritual online courses
- Spiritual book club

Membership:

Currently we are not taking any membership. However, if you want to share your thoughts with us, though we cannot guarantee that your comments will be posted, please email: unannesha@gmail.com

Kunal's Happy Moments: <https://www.youtube.com/watch?v=q9x3Rp-GRPk>

Today I am able to meet you all because of God who is taking care of me even when I am not full consciousness before this birth. I am starting my day by giving thanks to that Supreme Majesty of all Universe and Multiverse. When I was sleeping, I was in deep dark, but he was working on me so that I can see this beautiful day and brings some positive changes by this day because we cannot bring changes in one day. We learn everyday in smaller chunks and that habit bring permanent changes within ourselves. Every day in the morning, we should recite our oath, through which God initiated us so that if we fall behind from those values, we can remind ourselves in the end of the day to bring proper self-correction. This may bring 1% of changes in that day, but this practice will bring 100% changes to purify your soul forever.

Research Statement:

“Since 1945 our politics is so much incorrect spiritually that it is bringing the destruction of our world”

It is true that development of nuclear testing or threat of use of nuclear weapon is heading towards the destruction of our world, but we are not really incorrect spiritually in our politics. United Nation formed to control war and aggression which was wrong according to the principles of spirituality. United Nation is working on preservation of nature which we call Sustainable development goals.

United Nation was formed to maintain two main principles: one is jus in bello that deals with humanitarian law or the laws of war; and jus ad bellum that prohibit waging war by military necessity, distinction, proportionality, humanity. Following these principles, United Nation is successful to stop world war effectively. Also it stopped war between two countries or Interstate wars, but it failed to stop intrastate violence. After the creation of UN, the number of sovereign countries increased that raised conflict at international level. Some sovereign countries are going through difficulties to manage its resources. For example, Papua New Guinea or Cameroon is in high level of poverty.

Now the question remains about modern wars. War is always war whether its nature is interstate or intrastate. When modern war goes through armed conflict within any state, then it is the duty of the state to control it, but when state fails, then who is responsible? Isn't it the duty of UN to protect intrastate war when the war is affecting the world at large? Think about the situation in Cameroon, people are in poverty, lack of secured shelter, unable to sleep at night in fear of rebellion attack which denotes that their mental health is not well, lack of education and creation of employment which is forcing people to leave their country and increasing the pressure on other developing and developed countries. So it is admitted that our global politics is falling to stop any type of war whereas it was designed to stop war and aggression.

Now I want to consider this issue in scale of divine and eternal law because it is evident that positive law and natural is failing with the changing nature of war violence. Those look through their physical eyes only, they fail to recognize the contribution of Aquinas who divided law in four categories which are as follows:

- **Eternal law or how the universes are governed:** It is not proved through scientists yet with their physical equipment that there are different universe we have beyond our solar system which react with each other. We call this reaction as multiverse interaction. This is the core system of cosmic management. Scientists explored quantum physics and continuing their research work on discovering the end limit of cosmic world which we call cosmic management. This law is a kind of international law followed between different universes of our multiverse. This law mainly deals with the laws of Anti-matter means proton-electron-neutron reactions. Without Anti-matter means proton-electron-neutron reactions no Earth or air or fire or water or ether or mind or intelligence or ego can be created. No one will force you to believe that, but we cannot disagree that matter or people or human being are created by something or someone.
- **Divine law means religion:** Eternal law is defined through different religious textures like Ten Commandments or Bible or Bhagwat Gita or that what should be the principle of our life. Divine law is basically defining the eternal law means the laws of anti-matter and matter in words of different Gods like Krishna or Jesus Christ & so on. If you do not study your own preferred religious texture, then you fall behind in your work place because one needs to maintain the same vibration with Universe. Same is true for Multiverse and universe
- **Natural law means case laws:** Whether we agree or not case laws or Judgments pronounced in court proceedings are based on divine or eternal laws mainly. We need to connect through our subconscious mind to the universe to bring one settled law to another situation for its proper application. When one have clear idea on its own divine law, then this become easier for them.

- **Positive law means statute laws:** Many minds means many ways and many ways lead to absurdity sometimes. This absurdity can be washed out again through natural laws and this is the reason why we knocked the door of Temple of Justice and courts use literal rule, golden rule, or mischief rule to interpret the law by removing its absurdity.

Considering our situation here, I can say that indeed sometimes our domestic laws fails to maintain peace and harmony along with preservation of environment and personal development. To meet this failure United Nation came in, but when we are restricting its wings then UN is also failing to stop intrastate war like Cameroon. No matter whether intrastate or interstate, a war is always a war and in war people or government fails to maintain goals of sustainable development on which UN is focusing now.

When one country is going through hunger or poverty or creating employment, then its people are moving out of it. So other countries are under pressure that they have to accommodate some more people than their capacity that nature or universe gave them. This is putting threat to their social, personal, and environment also. They might be strictly maintain their environment, but you must appreciate that when 100 people drink water from a well that has been designed for 10 people, then water quality decreases and it cause health issues that transform to mental issues and ultimate affect the soul. This is true for every failure of goal of Sustainable Development of UN.

When we are failing to maintain the environment of our planet Earth, then that is affecting our universe just in the same way as it affecting our developing and developed countries. In our material world this effect is quick and short term, but in our universe effect of this is prolonged and long term. Whether one believes or not when energies need to take body from material world to free itself which is divine law. The way we are behaving with our world, it will be destroyed soon than its expected time span, but we do not have any habitable planet yet than our planet Earth. May be you are thinking that no one has seen the future or let's stay at present consciousness than to think what will happen after extinction of plant Earth,

I would love to guide them what happen to them. If a soul dies without being completely free, it need to born again with a body to free its required energy to leave this material planet. If planet Earth would not be in a position to give birth to a single again, then these souls or energies will be in enormous pain until they got a habitable planet. Energies do have sense and it is proved when we go in a dead state when we are sleeping, but can feel pain on our body and pain through dreams. We are not in our conscious state when sleeping. So, think about REM threat in your dream and in dreams most of the times we are unable to protect ourselves. Think how you feel until you wake up. Soul or energies have same feelings and they need a habitable planet to get their body to fight out their REM threats.

Universe shall not create any habitable planet for us because it has to work with same vibration with multiverse means other universes. Our universe gifted us a planet and if we destroy it by not believing on eternal and divine laws, then souls shall have to suffer from enormous pain. Since we do not have access to deal with eternal law or cosmic management, we need not to think about it, but we have our spiritual textures in our hand. It is the time when we need to review our laws with it. We have agendas, we have goals, but Sustainable Development goals are getting success like Millennium Development Goals because of lack of consciousness. Not only UN, but also every country must focus on its domestic laws, both natural and positive laws and compare it where it is going in different vibration with the divine laws.

In conclusion we can say that indeed we have agenda or goals, but today's politics is not in correct vibration with the universe and beyond.

How are You: <https://www.youtube.com/watch?v=9O9enOmyaTU>

Why people do not say that we are fine, thank you instead of saying life is going on. Is your mental vibration going on with the same direction of Universe? The person, with whom you are sharing, cannot help you, but you easily shared your thoughts. However, when you think that transform your physical issues through psychological dominance. It is necessary whether you have peace or not. You may have every material pleasure with no happiness or peace in life. There cannot be any life without problem. So presume whom to tell your problem and choose your words correctly because when you are telling that “it’s okay or going on”, it means you are always thinking about it and losing mental strength to solve it. Never share your problem randomly with anyone. Find solutions through your inner self that brings equal positive vibration between human & Universe. Hold peace within yourself because happy moments are very short.

My Good Wishes Of The Day:

We always demand something form God. How many times we give thanks or gratitude to that power for whom we are living? If you want to know the reasons why we should worship our both external & internal body and how to be more powerful daily by giving thanks to the Supreme Majesty, then...

It is true that the way we were living before formation of United Nation was really wrong?

Somnath De,

Informatic of this forum asks you,
